size

design

The drift wall sconce takes its shape from the natural flow of water, creating a sweeping effect similar to a natural stream cutting its way through the landscape. The outer edges give way, and move outward, to reveal a user-selectable splash of color when the light is turned on while white ambient light spills out from behind illuminating the environment it's placed in. Can be mounted vertically or horizontally. Available in three finishes.

light sources

LED - 2700K white.
RGB LED - User-selectable.

housing

CNC machined 6061 aircraft grade aluminum.

facade

CNC machined anodized brushed aluminum with laminated acrylic backing. Moving and stationary. *see website for additional options

installation

Wall plate adapter for installation on a 4" round remodel ceiling box or standard 1-Gang rectangular wall box. Light can be mounted vertically or horizontally.

transition time

4.5 seconds - closed/OFF to open/ON position.
